**Golik Holdings Announces Interim Results 2025**  
**Profit Attributable to Shareholders Amounted to approximately HK\$70,560,000**  
**Declaration of Interim Dividend of HK2.5 cents per Share**

(Hong Kong, 27 August 2025) — **Golik Holdings Limited** (Stock code: 1118) and its subsidiaries (“Golik Group”/“the Group”) is pleased to announce its interim results for the six months ended 30 June 2025. For the period, the Group’s total revenue was approximately HK\$1,818,056,000 (2024: approximately 1,728,693,000), representing an increase of 5% over the same period last year. After deduction of profit attributable to non-controlling interests, profit attributable to shareholders of the Company amounted to approximately HK\$70,560,000 (2024: approximately HK\$61,554,000), representing an increase of 15% over the same period last year. Basic earnings per share was HK12.28 cents (2024: HK10.72 cents).

The Board of Directors has declared an interim dividend of HK2.5 cents per share.

**Mr. Pang Tak Chung 潘國強, Chairman of the Group**, said, “Supported by the robust foundation of its two core businesses and years of dedication enhancing business quality, the Group maintained strong competitiveness amid these challenges. Through the diligent efforts of the management and staff, the Group achieved improved performance compared to the same period last year, delivering results that are deemed satisfactory.”

Metal products line of business comprises mainly of steel wires and steel wire rope products operated in Tianjin, Heshan and Jiangmen in Mainland China. Revenue for the period was approximately HK\$556,474,000 (2024: approximately HK\$519,151,000), representing an increase of 7% over the same period of last year. Profit before interest and taxation was approximately HK\$68,394,000 (2024: approximately HK\$44,235,000), representing an increase of 55% over the same period last year.

During the period, competition in the domestic market for steel wires and steel wire rope products intensified, especially in the elevator steel wire rope segment. The sustained downturn in the Mainland real estate market has precipitated a reduction in demand for new elevators, exacerbating industry-wide competition. The resulting imbalance between supply and demand has exerted significant downward pressure on profit margins across the supply chain, imposing substantial cost challenges on elevator manufacturers. Many of the Group’s elevator wire rope products faced further margin erosion, with certain markets experiencing prices below cost, resulting in the difficult decision to withdraw from those markets. Despite these challenges, the Group maintained a strategic emphasis on the maintenance and export markets for elevator wire rope products, achieving notable progress in these areas.

High-performance lifting steel wire rope products continued to deliver strong results, driven by advances in product research and development as well as expanded market outreach, particularly in export markets. Buoyed by the robust demand for high-performance lifting wire ropes, the overall profitability of steel wire rope products improved significantly compared to the same period last year, delivering encouraging results.

Building construction materials line of business comprises mainly of ready mixed concrete, precast concrete products and processing and distribution of construction steel products in Hong Kong. Revenue for the period was approximately HK\$1,248,094,000 (2024: approximately HK\$1,211,483,000), representing an increase of 3% over the same period last year. Profit before interest and taxation amounted to approximately HK\$71,326,000 (2024: approximately HK\$78,392,000), representing a decrease of 9% over the same period last year.

The increase in revenue for the building construction materials business as compared to the same period last year was primarily due to a reduced number of rainfall days in Hong Kong during the first half of the year, which facilitated a more consistent progression of construction activities. However, due to the market's general pessimism about the volume of forthcoming construction projects in Hong Kong, market competition has intensified, putting pressure on the gross profit margin of the building construction materials business. Throughout this period, the Group has consistently refrained from engaging in aggressive price competition, opting instead to focus on the provision of high-quality, value-added services to our customers. Despite the challenging operating environment, the building construction materials business delivered a performance that was regarded as relatively satisfactory.

Medical imaging business specialises in providing medical imaging services, including computed tomography (CT) scanning, magnetic resonance imaging (MRI) and positron emission tomography (PET) scanning. Revenue for the period was approximately HK\$15,269,000, and loss before interest and taxation was approximately HK\$7,884,000.

Since the official launch of the medical imaging centre in November 2024, the flagship centre at Tsim Sha Tsui, **Assure Medical Imaging (AMI)** has demonstrated a strong initial performance, achieving consistent revenue growth within its first six months and successfully attaining a positive variance in EBITDA. Despite mounting challenges stemming from the expansion of the Greater Bay Area and intensified competition from Mainland medical institutions in Hong Kong's private healthcare market, **AMI's** business model "centered on referrals from local specialist doctors" has proven resilient, maintaining a stable and steadily increasing referral base.

**Mr. Pang Tak Chung MH** concluded, "The prevailing macroeconomic challenges are anticipated to endure in the near term, exerting continued downward pressure on market demand within certain sectors of the Group's operations. In response to this challenging operating environment, the Group remains strategically focused on safeguarding its market position, advancing its products and operations toward the premium segment, and consistently adhering to its established developmental framework. The Group is confident that, through the sustained dedication and concerted efforts of its team, it will effectively overcome these challenges. Consequently, the Group maintains a cautiously optimistic outlook regarding its full-year performance."
